

# FISH FRIENDLY CAR WASH KIT INSTRUCTIONS

## Kit Includes

- 1 plastic storage tub
- 1 sump pump
- 1 spray nozzle
- 1 Fish Friendly sign
- 2 safety vests
- 1 white drain cover
- 2 extension cords with coilers
- 2 garden hoses with white cleanout cap
- 2 orange safety cones
- 1 electrical surge protector
- 4 bungee cords

**Step 1.** Place the white drain cover over round area drain.

**Step 2.** Use garden hose to fill white drain cover to form a seal over the drain.

**Step 3.** Place the pump on the low side of the drain cover where the water will collect. Once water starts to pool check to be sure the pump is in the water. Attach garden hose to pump (at black adapter location). A “snug” fit will do...forcing it more than this may strip the adapter and cause it to leak. NOTE: Attach the end with the swivel for easier turning.

**Step 4.** Place a cone on both sides of the drain cover.

**Step 5.** Align the garden hose and extension cord neatly across the parking lot, as shown in the photo. Locate the sewer cleanout in the planter bed below the wall with the drive-thru window. Attach the white cleanout cap to the cleanout. Attach the garden hose to the cap as shown.

**Step 6.** Plug sump pump unit into the extension cord. Take special care to keep the connection dry by doing this in a dry area PRIOR to car washing activity.

**Step 7.** Run the extension cord into the back door as shown in photo. NOTE: block the door open to avoid damaging the cord.

**Step 8.** Plug extension cord into yellow GFI/surge protector. (Keep connection dry).

**Step 9.** Plug yellow surge protector into power outlet. The pump will start automatically when water levels rise, and will periodically cycle on and off.

### Putting the Kit Away

**(Important!!)**

- Step 1. Unplug surge protector from wall
- Step 2. Unplug extension cord from surge protector
- Step 3. Unplug sump pump from extension cord
- Step 4. Remove sump pump unit and rinse it off.
- Step 5. Please detach and roll up hose and secure with bungee
- Step 6. Roll up extension cord and secure with bungee
- Step 7. Place all items back in the tub.

THANKS FOR BEING A FISH-FRIENDLY CAR WASHER!!
