

# FISH FRIENDLY CAR WASH KIT INSTRUCTIONS

## Kit Includes

- 1 plastic storage tub
- 1 sump pump
- 1 spray nozzle
- 1 Fish Friendly sign
- 2 safety vests

- 1 250ft extension cord
- 1 50ft garden hose with yellow reducer tube
- 2 orange safety cones
- 1 electrical surge protector
- 3 bungee cords

**Step 1.** Place the sandbag between the two curbs. Stand on it to wedge it in making it water tight.

**Step 2.** Place the pump to the side of the sandbag closest to Papa's. Once water starts to pool check to be sure the pump is in the water.

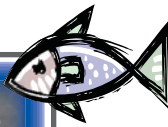

**Step 3.** Attach garden hose to pump (at white adapter location). A "snug" fit will do...forcing it more than this may strip the adapter and cause it to leak. NOTE: Attach the end with the swivel for easier turning.

**Step 4.** Insert the end of the garden hose with the yellow reducer tube into the sanitary manhole located in the driveway.

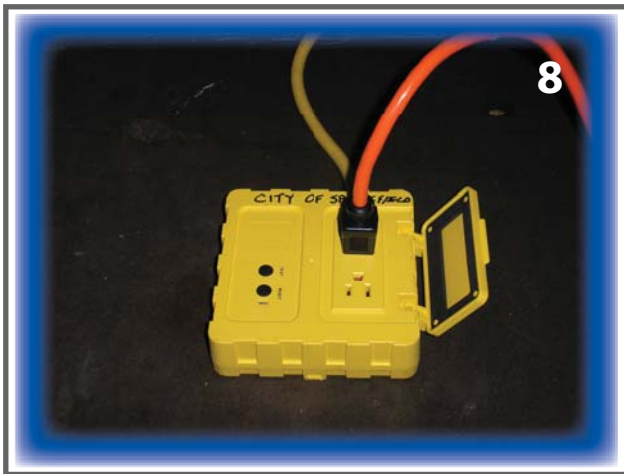

**Step 5.** Place the two orange cones on either side of the sanitary manhole.

**Step 6.** Plug sump pump unit into the extension cord. Take special care to keep the connection dry by doing this in a dry area PRIOR to car washing activity.

**Step 7.** Run the extension cord along the curb opposite of where the car wash is taking place.

**Step 8.** Plug extension cord into yellow surge protector. (Keep connection dry).

**Step 9.** Plug yellow surge protector into power outlet.

### Putting the Kit Away

**(Important!!)**

- Step 1. Unplug surge protector from wall
- Step 2. Unplug extension cord from surge protector
- Step 3. Unplug sump pump from extension cord
- Step 4. Remove sump pump unit and rinse it off.
- Step 5. Please detach and roll up hose and secure with bungee
- Step 6. Roll up extension cord and secure with bungee
- Step 7. Place all items back in the tub.

THANKS FOR BEING A FISH-FRIENDLY CAR WASHER!!
