

City of Springfield Wastewater Master Plan – Adopted Plan

The City of Springfield's Wastewater Master Plan Update (WWMP) was adopted by Council ordinance on June 16, 2008.

The WWMP will replace the outdated 1980 Sanitary Sewer Master Plan. Staff worked with consultant CH2MHill to prepare the WWMP, which identifies the City's existing and future wastewater needs, and system improvements necessary to address those needs. The plan provides basic data for the City's Capital Improvement Program and System Development Charge methodology, works in conjunction with the Wet Weather Flow Management Plan, and provides support to the engineering and development community.
